DENK Language

For examples of code refer README or test files

Feature

- Data Types
    - integer
    - real
    - boolean
    - string
- Variables
- Procedures
- Functions
- Flow Control
    - if
    - else if
    - else
- Loops
    - while...do
- Numerical Operators
    - +
    - -
    - *
    - /
    - div
- Logical Operators
    - and
    - or
    - not
- Comparison Operators
    - =
    - < >
    - <
    - < =
    - >
    - > =
- Bitwise Operators
    - leftshit(> >)
    - rightshift(< <)
    - not(~)
    - and(&)
    - or(|)
    - xor(^)

The syntax of this language is from inspired from pascal and for more on pascal go to Pascal Tutorial
